## ABOUT ME..

I'm a strong believer in being passionate and enjoying what you do. It is for this reason that after numerous years working in health as a Dietitian I switched to web development. I love knowing how things work and solving difficult problems. I like to plan, create and be a part of interesting projects. I am always on the lookout to learn and develop my skills further.

## EXPERIENCE

### WEB DEVELOPMENT IMMERSIVE

General Assembly | 2016 - 2017

- Created a photo sharing website using Ruby on Rails for professional and amateur photographers to share, tag and search for photos
- Worked in a team to plan and develop a website for craft brewery tours using Rails, Google Maps API, backbone and Parallax.js
- Developed a nutrition data visualisation site using D3.js where users can view vitamin structures, recommended intakes and food graphs
- Collaborate on projects using Git for version control

### CLINICAL DIETITIAN

Mater Children's Hospital | 2011 - 2014

Townsville Hospital | 2010 - 2011

- Research complex medical cases and implement tailored nutrition plans
- Manage heavy workloads and deal with sensitive data
- Handle highly emotional or stressful situations involving patients

### IT CONSULTANT

Fujitsu Australia | 2001 - 2004

- Record and troubleshoot desktop software and network problems
- Assist staff in creating and maintaining basic websites
- Train new employees in problem resolution processes
- Maintain service level agreements

## EDUCATION
